

Séverine OVYN

CURRICULUM VITÆ

PERSONAL

Date of Birth: August 31, 1982
Place of Birth: Anderlecht, Belgium
Status: Single
Language: French
Citizenship: Belgian

ADDRESSES

HOME	OFFICE
Avenue Albert 1 ^{er} , 81/202	Chemin du Cyclotron 2
1342 Limelette	1348 Louvain-la-Neuve
Belgium	Belgium
Tel: (+32) 479-70 43 54	Tel: (+32) 10-47 20 10

FORMATION EXPERIENCE

Doctorat en Sciences (Ph. D.) January 2006 - Present
Université catholique de Louvain, Louvain-La-Neuve (Belgium)
Subject: *Photon-induced physics at the LHC, including WH and Wt associated productions*
Supervisor: Prof. V. Lemaître

DEA en Sciences Physiques (Master) September 2004 - January 2006
Université catholique de Louvain, Louvain-La-Neuve (Belgium)
Title: *Production du boson de Higgs par interactions photon-proton dans le cadre du Modèle Standard*
Supervisor: Prof. V. Lemaître

Licence en Sciences Physiques September 2003 - June 2004
Université catholique de Louvain, Louvain-La-Neuve (Belgium)
Title: *Performance du système de déclenchement de CMS pour la production de bosons de Higgs suivis de leur désintégration en leptons taus*
Supervisor: Prof. V. Lemaître

TEACHING EXPERIENCE

Teaching assistant (UCL) September 2004 - Present
Supervision of laboratory and exercise sessions for undergraduate students (250h/year) in classical mechanics and electromagnetism

SCIENTIFIC STAY

CERN Summer Student, Geneva

July-August 2004

Supervisor: K. Blaum (CERN)

- ◊ The aim of this stay was to perform ion simulation studies to optimize the geometry for the deflector of a reference ion source, with respect to the shape of the ion beam and the transport efficiency. ISOLTRAP experiment, CERN.

6th ESA Student Parabolic Flight Campaign, Bordeaux

1 week, July 2003

Supervisors: J. Govaerts (UCL) and Gh. Grégoire (UCL)

- ◊ Test of the constancy of the velocity of light using a zero-gravity environment.

RESEARCH ACTIVITIES

◊ Trigger activities for CMS Forward Physics: software developments

(2007-2008) Contributions to the development of new trigger paths (L1+HLT) for the Forward Physics Group, in particular for the production of exclusive dielectrons, dijets, electron-jet-gap and forward jets with rapidity gaps in between. Work with X. Rouby and J.J. Hollar. These triggers have been integrated in the CMS software before the massive MC production (CSA07).

◊ Photon induced physics at LHC: phenomenology and analysis

(2005-present) Contributions to Louvain photon group activities (UCL CP3) in photon-photon and photon-proton related research. Interests in the production of photon-induced Higgs boson and single top quark. Extraction of the V_{tb} value of the Cabibbo-Kobayashi-Maskawa matrix element. Participation to the $\gamma\gamma \rightarrow \mu^+\mu^-$, $\gamma\gamma \rightarrow e^+e^-$ approved analysis for the CMS Forward Physics group, with its application to early LHC data observation. Photon-induced Higgs boson and single top quark production is also investigated.

◊ Fast simulation of a general purpose particle detector: software development

(2005-present) Design, development and validation with X. Rouby of DELPHES, a fast simulator of a general purpose particle detector.

SKILLS AND COMPETENCES

ORGANISATIONAL

◊ CP3 lunch seminar chairwoman

September 2008 - present

Organisation of weekly internal seminars during the academic semesters. The aim of these is the presentation of the work of Ph. D. students, post-docs and any members of the Center for Particle Physics and Phenomenology (UCL CP3).

◊ CERN L3 coordinator

September 2007 - June 2008

Representative of the Forward Physics Group to the Trigger Study Group (position shared with X. Rouby)

LANGUAGE

◊ French: Mother tongue

◊ English: Intermediate oral and written skills

COMPUTER

Developper in C/C++/Root; user of Fortran 77, Pythia, MadGraph, CalcHEP, CompHEP, Tauola. Linux and MS Windows environments

OTHERS

Holder of a Belgian driving license, category B vehicle.
